Brett Construction Company Ranks in Top 50 Metal Builders in the Nation

Lexington Clinic - New South Broadway Campus, Lexington, Kentucky

Lexington, KY – Brett Construction Company remains one of the nation’s top metal builders, as ranked by *Metal Construction News*, the nation’s leading news magazine for the metal construction industry. The list ranks the top 100 metal builders in the United States by two segments – by square footage of metal constructed and by tonnage of steel purchased.

Brett Construction Company is the nation’s #33 largest metal builder by tonnage of steel purchased with 1,488 tons in 2019. The firm also ranks #37 in square footage, with 400,103 square feet in 2019. Brett Construction Company is one of only three builders in Kentucky ranked in the top 50 firms.

“Our firm is uniquely positioned in the commercial construction industry to offer a variety of delivery methods and building options to our clients,” said Brett Setzer, CEO of Brett Construction Company. *“Our ability to self-perform certain trades like steel erection and our ability to provide full lines of pre-engineered metal building systems to our clients is one of the things that sets us apart and ranks us among the nation’s top metal builders.”*

Brett Construction Company works exclusively with Varco Pruden Buildings, a world leader in pre-engineered metal and steel construction systems based in Memphis, Tennessee, that serves a national and international client base.

Brett Construction Company has more than 30 years of commercial construction experience, including industrial, institutional, educational, health care and commercial clients throughout the Commonwealth of Kentucky and the United States. Some of the firm’s current and long-standing clients include FedEx, XPO Logistics, the Commonwealth of Kentucky, Transylvania University and Lexington Clinic. In addition, Brett Construction Company also shares ownership with Setzer Properties, a national real estate investment and development firm with more than 30 years of experience. The firm has developed more than 6.5 million square feet of space for projects across 28 states totaling more than \$750 million. Both firms are headquartered in Lexington, Kentucky.
